EDUCATION

Cornell University, Cornell Tech, Jacobs Technion-Cornell Dual Master of Science | **New York, NY**
M.S. in Applied Information Science & Information Systems, Connective Media, May 2028
Washington University in St. Louis, School of Engineering | **St. Louis, MO**
B.S. in Computer Science, Minor in Human-Computer Interaction, May 2023
Major GPA: 3.79/4.00, Cumulative GPA: 3.72/4.00
Honors: Dean's List (6 consecutive semesters: Spring 2020 - Fall 2022)

SKILLS

Product: User Research (Interviews, Surveys, Contextual Inquiry), Requirements Gathering, Stakeholder Communication, Prioritization
Data & AI: SQL, Python, Pandas, NumPy, Excel, Jupyter, Matplotlib, TensorFlow, scikit-learn, LLM APIs, RAG / Hybrid Retrieval
Technical: Java, JavaScript, C++, C#, HTML/CSS, Spring Boot, ReactJS, Vue.js, Hibernate, Material UI, Docker, Git, Postman

PROFESSIONAL EXPERIENCE

Morningstar Inc., *Software Engineer*, July 2023 - June 2026 | **Chicago, IL**
- Owned Historical Bulk Delivery end to end: gathered requirements from operations and client-facing teams, scoped the build, and shipped Hibernate endpoints and UI that streamlined file delivery to 1,000+ clients and cut data input from days to minutes
- Gave the operations team a single view of portfolio data (index variants, constituents, hedge data, FX rates) through a Portfolio Observability page with self-serve data reload and recalculation, eliminating most of the 4-5 weekly escalations to engineering
- Delivered SmartX data delivery feature (Spring Boot, HCL), aligning delivery requirements with business stakeholders to launch a client-facing data offering that generates $50K in annual revenue
- Consolidated 200+ index documents into a structured table on indexes.morningstar.com/resources, enabling client self-service

LB Networks, *Software UX Developer Intern*, June 2022 - September 2022 | **St. Louis, MO**
- Improved OcularIP 6.0.4 website functionality for 130 service provider companies, turning usability pain points into UI fixes
- Redesigned Subscription Panel graphs and buttons (ReactJS, Material UI) so customers could read subscription data at a glance

Ford, *Data Science Intern*, June 2021 - August 2021 | **Shanghai, CN**
- Ran SQL correlation analysis on 100,000+ prospective customers (age, showroom visits, number of test drives) to identify the top 3 factors driving conversion from prospects to Lincoln customers
- Built a ReactJS dashboard to communicate findings to Lincoln project managers and inform resource allocation

PROJECTS

Footnote, *AI Product Project*, September 2026
- Interviewed 6 target users on how they research 10-K filings; found that because they could not tell whether a chatbot's conclusion came only from the filing, they re-checked answers against the source themselves
- Wrote a PRD defining target users, v1 scope (grounded Q&A that answers only from the filing, with citations) vs. v2, and success metrics for answer and citation accuracy
- Built a 50-question eval set from real SEC filings: about 84% answer accuracy and 100% correct citations, while ChatGPT mixed in non-filing sources; improved table handling to raise table-heavy accuracy from 50% to about 80%
- Built in Python with table-aware chunking and hybrid retrieval (BM25 + vector search via reciprocal rank fusion, Chroma)

Manim Lesson Builder, *Independent Project*, September 2026
- Built a pipeline that turns one structured lesson file into a finished teaching video with animated visuals, narration, captions, and transcript (Python, Manim, FFmpeg, AWS Polly), rendered in a network-isolated Docker sandbox
- Cut cost per 3-minute lesson to about $0.08, 200x below generative video models ($18-$135) that cannot reliably render correct equations

FridayFlicks, *Independent Project*, September 2024 - June 2025
- Took an Android app from idea to working product that turns a user's spoken movie review into a numerical rating, using Google Assistant voice-to-text and an on-device TensorFlow Lite sentiment model

LEADERSHIP

Cohort Representative, Connective Media, *Cornell Tech Student Government*, Aug 2026 - Present
- Elected by peers to represent 70+ students to program leadership and faculty, gathering feedback, advocating for student needs, and building an alumni mentorship pipeline connecting students with recent graduates

Alpha Kappa Psi Business Fraternity, *Member*, Spring 2020 - Spring 2023
